

Central Engineering Co., Ltd.

Location : 5272-4 Oaza-Okiube, UBE-CITY, YAMAGUCHI-KEN, 755-0001, Japan

Representative : Eiji KURAMA

Business Classification	Capital	No. of Employees	Established
Construction	¥30,000,000	116	1972

Description of Business: We offer total support of industries with integrated plant engineering such as plant construction and maintenance.

<p>Main Products and Business: Design and construction of various plants, civil work and electrical work / Making computer software and gas equipment of tube for semiconductor / Maintenance and repair of equipment</p>
<p>Main Equipment and Facilities: Assemble factory for CFC gas equipment / lab / Processing factory for resin canning and machinery / 50 computers with LAN / CAD (computer aided design)</p>
<p>Qualified Permits, Registrations and Others: 1st class architect office / construction (specified); building / civil work / electrical work / piping / steel structure / placing machinery and equipment / scaffolding</p>
<p>Licensed and Qualified Engineers & Specialists: 3 civil work control technicians (1st class) / 2 architects (1st class), 4 (2nd class) / 1 septic tank technicians / 3 construction control technicians (1st class), 1 (2nd class) / 2 piping work control technicians / 4 electrical work control technicians / 1 pollution control manager (noise), 1 (water), 1 (air)</p>

Environmental Preservation Activities

Other	Education for pollution control managers and heat control engineers
--------------	---

Eco-business and Eco-products

Equipments to Reduce Pollution	Assemble factory for CFC gas purification equipment / Manufacturing and installation of raking machine, scraper and dust collector (sewage purification equipment)
Services for Environmental Preservation	Consulting for pollution / Installation of recycling equipment
