

Kyodo Sangyo, Ltd.

Location : 850-2 Shimo-Osaba, YAMAGUCHI-CITY, YAMAGUCHI-KEN, 753-0212, Japan

Representative : Taro YAMAJI

Business Classification	Capital	No. of Employees	Established
Molded wood fuel manufacturer	¥10,000,000	14	1959

Description of Business : We produce and supply high quality molded fuel made from recycled wood chips. We try to conserve forests owned by our company. We also contribute to decreasing CO₂ emission with the production and supply of charcoal. The charcoal is formed by wood chips being placed in a mold, which is then carbonized. We are striving to develop new products with our own carbonization technology.

<p>Main Products and Business: Molded wood fuel (Ogalight) / Molded wood charcoal (white / black charcoal) / Manufacturing oil adsorbent / Forestry</p>
<p>Main Equipment and Facilities: Facilities for manufacturing molded fuel and oil adsorbent and for charcoal burner</p>
<p>Licensed and Qualified Engineers / Specialists: Recycling wood chips (Yamaguchi Pref.)</p>

Eco-business and Eco-products

Eco-products	Molded wood fuel (effective use of wood chips) / Molded wood charcoal (low CO ₂ emission by alternative carbonization methods) / Oil adsorbent (carbonized coffee grounds effectively)
Services for Environmental Preservation	Forestry industry

International Contributions for Environmental Technology: Two Cambodian trainees were invited for two weeks in November, 1994 in order to learn the technology of manufacturing Ogalight / An expert was sent to Battambang, Cambodia for a duration of 15 days every year from 1993 to 1996. He instructed how to make the Ogalight with sponsorship from the Ministry of Fishery, Forestry as well as Foreign Ministry.
