

Ube Analysis Center Ltd.

Location: 15-5254 Aza-Okinoyama, Oaza-Okiube, UBE-CITY, YAMAGUCHI-KEN, Japan

Representative: President Junzo NAKAJIMA

Business Classification	Capital	No. of Employees	Established
Service industry	20,000,000	22	1983

Description of Business : Our company has tried to contribute to a better society through our business since Ube Analysis Center was established. We have inherited the excellent analysis technology developed in Ube Plant of Central Glass Cooperation.

<p>Main products and Business : The material analysis / The analysis concerning the environmental preservation / The environmental measurement at work</p>
<p>Main Facilities : Gas-chromatograph-mass spectrometer / ICP mass analysis device / X-ray fluorescence analysis system / X-ray diffract meter / ICP emission spectrochemical analysis system / Atomic absorption spectrometric photometer / Gas-chromatograph / Ion-exchange chromatography / High precision liquid chromatography / Frameless atomic absorption spectrometric photometer / Dust and smoke measurement system / Noise and oscillation measurement system / Continuous exhaust measurement system / Others</p>
<p>Main Facilities for Environmental Preservation : 3 scrubbers for washing exhaust / Drainage neutralization tank</p>
<p>Qualified Permits, Resistrations and Others : Measurement proof business (concentration, noise level, oscillation acceleration) / Examination of drinking water / Environmental inspection facilities (1,3,4,5)</p>
<p>Licensed and Qualified Engineers & Specialists : 2 environmental mass measurers / 4 environmental inspection engineers / 1 Odor measurement engineer</p>

Products to Reduce Negative impact on the Environment	Analysis on recycled objects
Services for Environmental Preservation	Analysis on soil and underground water / Issuing the certificates for survey (concentration / noise level / acceleration of the oscillation level) / Measurement of the work environment / Water quality test for the drinkable water of the architecture
