

Ube Ammonia Industries Co., Ltd.

Location : 2575 Fujimagari, UBE-CITY, YAMAGUCHI-KEN, Japan

Representative : Takaki SAKAMOTO

| Business Classification | Capital | No. of Employees | Established |
|-------------------------|----------------|------------------|-------------|
| Chemical Industry | ¥4,000,000,000 | 82 | 1969 |

Description of Business : Contribution for waste plastics treatment using coal gasification plant

| |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Main Business and products :</p> <p>Liquid ammonia</p> |
| <p>Main Equipment and Facilities :</p> <p>Coal gasification plant / Air separation unit / Ammonia synthesis plant / Coal boiler</p> |
| <p>Main Facilities for Preventing Pollution :</p> <p>Electric precipitator / Waste water treatment facilities (cyanide treatment, COD removal, Ammonia removal, and Fluorine and S S removal)</p> |
| <p>Licensed and Qualified Engineers & Specialists :</p> <p>Chief engineers for safe control of high pressure gas ; 8 (Ko / chemical),7 (Ko / mechanics),16 (Otsu / chemical) , 32 (Otsu / mechanics), / Machinery maintenance specialists ; 4 mechanics (1st class) , 31 mechanics (2nd class) , 1 electricians (1st class) , 1 electricians (2nd class) / Energy control engineers ; 7 (heat) , 2 (electrical) / Pollution control manager ; 6 (water quality / 1st class) , 7 (air / 1st class)</p> |

Eco-Business and Eco-Products

| | |
|--------------------------------------------------------------|-----------------------------------------------------------------|
| Products to Reduce Negative impact on the Environment | Ammonia production using recycling technology of waste plastics |
|--------------------------------------------------------------|-----------------------------------------------------------------|
