
Synchrotech Co., Ltd.

Location : 229-4 Oaza-Nakaube, UBE-CITY, YAMAGUCHI-KEN, 755-0086, Japan
Representative : Katsuyuki MUROKI

Business Classification	Capital	No. of Employees	Established
Construction , Manufacturing electrical appliances	¥45,000,000	115	1927

Description of Business: We have services for various fields in the system construction with integrated technology. We also carry out equipment design and after-sales service. Our principle of management is "meeting the needs of our customers".

Main Products and Business : Construction / Wholesale dealer for industrial electrical appliance / Various kinds of control devices / Manufacturing alarm device and others
Main Equipment and Facilities : A system factory (an assembly factory for distributing boards)
Qualified Permits, Registrations and Others : Construction / Electrical work (Yamaguchi Pref.) / Construction (Civil work , Steel structure , Mechanical equipment , Water supply , Piping , Fire station , Telecommunication) (Yamaguchi Pref.)
Licensed and Qualified Engineers & Specialists : civil work control technicians (1st) 2, (2nd) 6/ piping work control technicians (1st) 2, (2nd) 5 / electrical work control technicians (1st)

Environmental Preservation Activities

Environmental Equipment	Electrical & mechanical facilities for water supply, sewage disposal, garbage disposal facilities (Receiving and distributing board , Control board , Monitoring & control system and others)
Environmental Products	Sale of recycling bottles in an attempt to decrease plastic bottles

Outline of Business (Flow System and Photos)

Installation of Receiving and Distributing Boards for Factories and Plants

We promote intelligence and networking by integrating various kinds of facilities and machines with the latest technology of information and communication as well control. We are able to suggest system construction according to customers' needs of ideas and plans; receiving and distributing boards for factories, plants and public facilities, distant operation with centralized control and communication technology.

Integrated System

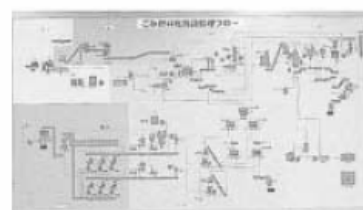

Centralized operation room for calcination facility

We offer integrated systems; Centralized monitoring control for irrigation and draining semiconductor, facilities for steel, chemistry, food

Reliable System; Process Control and Mechatronics

A reliable system with experience and well-developed strategy offers;

Process control for water supply, electrical power, gasoline
Mechatronics control for paper, glass, distribution

Graphic panel for garbage disposal facility

Public Facilities; Water Supply and Sewage

Public Facilities should consider safety and convenient life for people in public in accordance with nature. Therefore they need to be constructed with highly developed technology which can promote automation and information control of machines. Our company started to construct water supply infrastructure in 1972. Since then we have been designing, planning and constructing electrical and mechanical facilities of sewage and draining against the high tide. Now we are building a small water supply and decentralized waste water treatment facility in villages.

Filtration plant

Joint venture business with other companies

We have done a large amount of design and construction which is widely recognized.

Incinerator environmental and sanitary system, communication for prevention of disasters, highway monitoring system, fire fighting and prevention of disasters system

Control room for garbage disposal treatment facility
