
Ube Ammonia Industries Co., Ltd.

Location : 2575 Fujimagari, UBE-CITY, YAMAGUCHI-KEN, Japan

Representative : Takaki SAKAMOTO

Business Classification	Capital	No. of Employees	Established
Chemical Industry	¥4,000,000,000	82	1969

Description of Business : Contribution for waste plastics treatment using coal gasification plant

Main Business and products : Liquid ammonia
Main Equipment and Facilities : Coal gasification plant / Air separation unit / Ammonia synthesis plant / Coal boiler
Main Facilities for Preventing Pollution : Electric precipitator / Waste water treatment facilities (cyanide treatment, COD removal, Ammonia removal, and Fluorine and S S removal)
Licensed and Qualified Engineers & Specialists : Chief engineers for safe control of high pressure gas ; 8 (Ko / chemical), 7 (Ko / mechanics), 16 (Otsu / chemical) , 32 (Otsu / mechanics), / Machinery maintenance specialists ; 4 mechanics (1st class) , 31 mechanics (2nd class) , 1 electricians (1st class) , 1 electricians (2nd class) / Energy control engineers ; 7 (heat) , 2 (electrical) / Pollution control manager ; 6 (water quality / 1st class) , 7 (air / 1st class)

Eco-Business and Eco-Products

Products to Reduce Negative impact on the Environment	Ammonia production using recycling technology of waste plastics
